

Kile® Clear View® Cap - CH 543 Kit

35/45/55 Challenger CH Installation Instructions

Remove OEM cap. Allow oil to completely drain. Remove any old gasket material from face of roller and idler hubs. Bolt the Kile® clear view® cap, with gasket, to the hub and tighten roller and idler bolts to 35-40 inch pounds. Replace oil to manufacture specifications. Install plug and tighten with plug wrench.

Do not over tighten mounting bolts. Over tightening voids warranty.

Use only soap and water to clean caps, no solvents (solvents can cause clouding and premature failure of caps. Solvent use will void warranty)

Part ID	Description	Quantity
K CH3456-I	Idler Cap	4
K CH3456-IGE	Idler-Elongated Gasket Bolt Holes	4
