

Clear View® Cap JD 8000 Series Kit

Installation Instructions for JD 8000 Series

Remove OEM cap. Allow oil to completely drain. Remove any old gasket material from face of roller and idler hubs. Bolt the clear view® caps, with gaskets, to the hub and tighten bolts to 35-45 inch pounds. Replace oil to manufacture specifications. Tighten plug with plug wrench.

Do not over tighten mounting bolts. Over tightening voids warranty. Use only soap and water to clean caps, no solvents(solvents can cause clouding and premature failure of caps. Solvent use will void warranty)

Part ID	Description	Quantity
K JD8024-R	JD 8024 Roller Cap	12
K JD8025-I	JD 8025 Idler Cap	4
